Ranjith Sai Vadithya

BACKEND ENGINEER | JAVA | SPRING BOOT | MICROSERVICES

ranjithsaivadithya14@gmail.com +91 9440754054 Bangalore linkedin.com/in/vadithya-ranjith-sai

PROFILE

Backend Engineer with nearly 3 years of experience building and maintaining production applications using Java, Spring Boot, Microservices, Node.js, Laravel, Redis, and MySQL. Experienced in designing **scalable REST APIs, backend services, AI integrations, and microservice architectures**, with hands-on expertise in **AI-powered resume parsing, job description processing, candidate matching, payment workflows, caching, and database optimization**. Skilled in **technical leadership, production troubleshooting, performance optimization, concurrency management, and reliable data processing** across production environments.

PROFESSIONAL EXPERIENCE

Rayudu Group, *Senior Software Engineer & Tech Team Lead* 10/2026 – Present | Anantapur, Andhra Pradesh

- Lead **technical development and engineering coordination** to deliver backend features and platform enhancements for production applications.
- Design and maintain **scalable backend services, REST APIs, and application integrations**, following modular architecture and maintainable coding practices.
- Guide **technical implementation, code reviews, debugging, and testing** to improve code quality and application reliability.
- Coordinate feature development across the **software development lifecycle (SDLC)**, including requirement analysis, implementation, integration, and deployment support.
- Collaborate with **cross-functional stakeholders** to translate business requirements into technical solutions and deliver features within project timelines.
- Contribute to **backend architecture, database integration, performance optimization, and production troubleshooting** to improve system reliability.

MudarDzApps Praxo (Startup), *Software Engineer* 08/2025 – 09/2026

- Designed and developed **Java Spring Boot microservices and REST APIs** supporting core social-media, creator, rewards, and financial workflows.
- Built **creator scoring, rewards, payout, and withdrawal systems**, including transactional chips-to-cash workflows with a focus on data integrity.
- Integrated **WhatsApp and SMS communication workflows** for transactional notifications, marketing communications, and OTP delivery.
- Designed and optimized a **Redis-backed personalized feed and recommendation system** using user activity, engagement patterns, caching, and user interaction state.
- Improved backend and database performance through **query optimization, indexing, batching, and efficient data-access patterns**, reducing database overhead by ~25%.
- Investigated and resolved **production performance, concurrency, database, and connection-pool bottlenecks** across backend services.
- Built automated **settlement and payout workflows** with Excel report generation, SFTP-based processing, and IMPS integration, while developing analytics for DAU, HAU, live activity, and user engagement.
- Optimized **high-volume Redis-based view and engagement processing** using asynchronous and batched operations, and deployed and maintained Spring Boot services using AWS EC2, SSH, and SFTP workflows.

Spider Hit Infotech Pvt Ltd (Startup), *Software Developer* 12/2023 – 07/2025

- Developed and maintained **12+ enterprise and e-commerce applications** using Laravel, MySQL, React.js, and REST APIs.
- Designed and implemented **modular backend services and REST APIs** using Laravel and MySQL for customer-facing and administrative applications.
- Developed business workflows covering **authentication, payments, product management, bookings, and administrative operations**.
- Integrated **payment gateways** and implemented secure authentication and role-based application workflows.
- Designed database schemas and optimized **MySQL queries** to improve application performance and maintainability.
- Built responsive **React.js** interfaces and administrative dashboards integrated with Laravel backend services.
- Worked across the complete software development lifecycle, including **API development, database design, frontend integration, testing, debugging, and production support**.

TECHNICAL SKILLS

Languages
Java, JavaScript, PHP, SQL

Backend
Spring Boot, Microservices, Node.js, Express.js, Laravel , REST APIs

Databases & Caching
MySQL, Redis, Prisma ORM, Database Design, Query Optimization

AI & Integrations
AI Gateway, LLM Integration, Groq, Google Gemini, Zoom API, OAuth 2.0

Cloud & Infrastructure
AWS EC2, S3, RDS, SSH, SFTP

Frontend
React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Architecture & Engineering
Microservices Architecture, MVC, Clean Architecture, Caching, Asynchronous Processing, Performance Optimization, Code Reviews, Technical Leadership

Tools & Development Practices
Git, Postman, Maven, API Integration, Debugging, Testing, SDLC

EDUCATION

Anantha Lakshmi Institute of Technology and Sciences, *Electrical and Electronics Engineering* 2019 – 2022 | Anantapur

PROJECTS

RonoJobs – AI-Powered Recruitment Platform, *Node.js, Express.js, Prisma, AI Gateway, Groq, Gemini, Zoom API*

- Developed **AI-powered resume parsing and job description (JD) parsing** workflows to extract structured candidate profiles and job requirements.
- Implemented an **AI Gateway with provider integration and fallback handling** to support AI-powered recruitment features.
- Built **automated JD auto-fill workflows** to simplify job posting creation and reduce manual data entry.
- Implemented **AI-driven candidate-to-job matching** to align candidate skills, experience, and profiles with job requirements.
- Integrated **Zoom Server-to-Server OAuth** for meeting creation and interview-related workflows.

Praxo - Social Media Platform, *Java, Spring Boot, Microservices, React.js, Redis, MySQL*

- Developed backend services for a **short-video social media platform** using Java, Spring Boot, Microservices, Redis, and MySQL.
- Built **creator monetization workflows** covering scoring, rewards, payouts, and settlements.
- Designed a **Redis-backed personalized feed and recommendation system** using user activity and engagement data.

Ride Wheels, *Laravel, React, MySQL*

- Designed and developed the **backend architecture and REST APIs** using Laravel, supporting customer and vehicle-owner mobile apps.
- Implemented **vehicle listing, search, booking, scheduling, pricing, and payment workflows**, along with referral bonus and coupon systems covering rewards, eligibility, and discounts.
- Integrated **WhatsApp notifications** for booking confirmations, booking-status updates, and customer communications, along with SMS-based OTP authentication.
- Developed **authentication and role-based access control** for customers, vehicle owners, and administrative operations, and built a React.js admin portal for vehicle, booking, pricing, and approval management.

Atal Incubation Centre — Incubation Management Portal, *Laravel, MySQL, Bootstrap*

- Developed a web portal for managing **incubation programs, startups, events, blogs, and notifications**.
- Built an **admin dashboard** with charts, reports, search, document management, and email alerts.
- Developed Laravel backend workflows and **MySQL database integration** supporting platform management operations.
