# Ranjith Sai Vadithya

BACKEND ENGINEER | JAVA | SPRING BOOT | MICROSERVICES

ranjithsaivadithya14@gmail.com +91 9440754054 Bangalore linkedin.com/in/vadithya-ranjith-sai

## PROFILE

**Backend Engineer with nearly 3 years of experience** building and maintaining production applications using Java, Spring Boot, Microservices, Laravel, Redis, MySQL, and React. Experienced in designing REST APIs, backend services, personalized feed and recommendation systems, payment and payout workflows, database optimization, caching, and production performance troubleshooting. Hands-on experience building scalable systems and solving backend performance, concurrency, and data-processing challenges in production environments.

## PROFESSIONAL EXPERIENCE

**MudarDzApps Praxo (Startup),** *Software Engineer* 08/2025 – Present

- Designed and developed **Java Spring Boot microservices and REST APIs** supporting core social-media, creator, rewards, and financial workflows.
- Built **creator scoring, rewards, payout, and withdrawal systems**, including transactional chips-to-cash workflows with a focus on data integrity.
- Integrated **WhatsApp and SMS communication workflows** for transactional notifications, marketing communications, and OTP delivery.
- Designed and optimized a **Redis-backed personalized feed and recommendation system** using user activity, engagement patterns, caching, and user interaction state.
- Improved backend and database performance through **query optimization, indexing, batching, and efficient data-access patterns**, reducing database overhead by ~25%.
- Investigated and resolved **production performance, concurrency, database, and connection-pool bottlenecks** across backend services.
- Built automated **settlement and payout workflows** with Excel report generation, SFTP-based processing, and IMPS integration, while developing analytics for DAU, HAU, live activity, and user engagement.
- Optimized **high-volume Redis-based view and engagement processing** using asynchronous and batched operations, and deployed and maintained Spring Boot services using AWS EC2, SSH, and SFTP workflows.

**Spider Hit Infotech Pvt Ltd (Startup),** *Software Developer* 12/2023 – 07/2025

- Developed and maintained **12+ enterprise and e-commerce applications** using Laravel, MySQL, React.js, and REST APIs.
- Designed and implemented **modular backend services and REST APIs** using Laravel and MySQL for customer-facing and administrative applications.
- Developed business workflows covering **authentication, payments, product management, bookings, and administrative operations**.
- Integrated **payment gateways** and implemented secure authentication and role-based application workflows.
- Designed database schemas and optimized **MySQL queries** to improve application performance and maintainability.
- Built responsive **React.js** interfaces and administrative dashboards integrated with Laravel backend services.
- Worked across the complete software development lifecycle, including **API development, database design, frontend integration, testing, debugging, and production support**.

## TECHNICAL SKILLS

**Languages**
Java, JavaScript, PHP, SQL

**Backend**
Spring Boot, Microservices, REST APIs, Laravel

**Databases & Caching**
MySQL, Redis, Database Design, Query Optimization

**Cloud & Infrastructure**
AWS EC2, S3, RDS, SSH, SFTP

**Frontend**
React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

**Architecture & Engineering**
Microservices Architecture, MVC, Clean Architecture, Caching, Asynchronous Processing, Performance Optimization

## EDUCATION

**Anantha Lakshmi Institute of Technology and Sciences,** *Electrical and Electronics Engineering* 2019 – 2022 | Anantapur

## PROJECTS

**Praxo - Social Media Platform,** *Java, Spring Boot, Microservices, React.js, Redis, MySQL*

- Developed backend services for a **short-video social media platform** using Java, Spring Boot, Microservices, Redis, and MySQL.
- Built **creator monetization workflows** covering scoring, rewards, payouts, and settlements.
- Designed a **Redis-backed personalized feed and recommendation system** using user activity and engagement data.

**Ride Wheels,** *Laravel, React, MySQL*

- Designed and developed the **backend architecture and REST APIs** using Laravel, supporting customer and vehicle-owner mobile apps.
- Implemented **vehicle listing, search, booking, scheduling, pricing, and payment workflows**, along with referral bonus and coupon systems covering rewards, eligibility, and discounts.
- Integrated **WhatsApp notifications** for booking confirmations, booking-status updates, and customer communications, along with SMS-based OTP authentication.
- Developed **authentication and role-based access control** for customers, vehicle owners, and administrative operations, and built a React.js admin portal for vehicle, booking, pricing, and approval management.

**Atal Incubation Centre — Incubation Management Portal,** *Laravel, MySQL, Bootstrap*

- Developed a web portal for managing **incubation programs, startups, events, blogs, and notifications**.
- Built an **admin dashboard** with charts, reports, search, document management, and email alerts.
- Developed Laravel backend workflows and **MySQL database integration** supporting platform management operations.
